

General product description

Steeltec's Xtreme Performance Technology enables the boron-containing Q&T steel 33MnCrB5-2 to be modified to meet customer-specific processing or component requirements.

As 33MnCrB5-2 XTP combines very high strength and toughness, it is particularly well suited for safety-relevant parts in automotive construction, such as chassis and suspension components and drive and transmission shafts. It is also suitable for components that are exposed to extremely low temperatures.

Mechanical-technological properties

Variant	R _{p0,2} [MPa]	R _m [MPa]	A ₅ [%]	A _g [%]	Z [%]	KV _{RT} [J]	T ₂₇ [°C]
high strength, extreme toughness	880	940	17	6	60	130	-101
very high strength, very high toughness	1090	1130	15	4	60	100	-80
very high strength, high toughness	1290	1350	12	3	60	50	-40

Typical mechanical-technological values.

R_{p0,2} = yield strength (at 0.2% offset), R_m = tensile strength, A₅ = elongation after fracture, A_g = uniform elongation, Z = reduction of area at fracture, AV = notch impact energy (ISO-V, specimens), RT = room temperature, T = temperature, T₂₇ = transition temperature at 27 J

Chemical composition (cast analysis by mass-%)

Variant	C	Si	Mn	P	S	Cr	B
min.	0,30	-	1,20	-	-	0,30	0,0008
max.	0,36	0,40	1,50	0,025	0,035	0,60	0,0050

The chemical analysis corresponds to 33MnCrB5-2 (1.7185).

Maximum carbon equivalent

Max. CET (CEV) 0,55 (0,74)

Typ. CET (CEV) 0,50 (0,68)

$$\text{CET} = \text{C} + \frac{\text{Mn} + \text{Mo}}{10} + \frac{\text{Cr} + \text{Cu}}{20} + \frac{\text{Ni}}{40}$$

$$\text{CEV} = \text{C} + \frac{\text{Mn}}{6} + \frac{\text{Cr} + \text{Mo} + \text{V}}{5} + \frac{\text{Cu} + \text{Ni}}{15}$$

Surface properties

Bars are 100% eddy current tested acc. to surface quality class 3 of EN 10277-1. Bar ends untested on both sides with a length of 50 mm if not otherwise requested by customer.

Miscellaneous

Other agreements acc. to order.

Condition of delivery

- Bar, black or peeled
- Diameter range 18 – 40 mm, tolerance h11 (black) or h9 (peeled)
- Bar straightness 0,5 mm/m

Fabrication and other recommendations

Moderately good machinability, good cold workability, good weldability.
